MEMORANDUM FOR:	Executive Steering Group for the Electronic Information Security Project			
SUBJECT:	First Meeting of Joint IC/DoD Electronic Information Security (ELINFOSEC) Steering Group	25 X 1		
1. The Executive Steering Group for Strategic Planning endorsed and supported the need for an aggressive thrust on Electronic Information Security (ELINFOSEC) at the 12 May 1983 meeting, and agreed to assist in the effort. The project is led by and is described in the brief and is described in the brief strategic planning issue paper attached. It was proposed that the first meeting of the ELINFOSEC Steering Group be held in early June to review the				
progress of priorities.	effort and to provide further guidance, direction, and	25X1 25X1		
Intelligence Commutheir support and definition of the to one that covers	has met or will soon meet with unity and DoD principals to discuss the effort and to solicit guidance. Based on discussions at her initial meetings, the effort was broadened from the original "computer security" all forms of electronic information processing, and is name change to Electronic Information Security.	25X1 25X1		
3. It was no address the DDCI's "Community-coordinary Community comp	project would project would at the ESG(P) meeting that project would 10 May 1983 memorandum tasking the Community to develop nated minimum computer standards" which would be applied "to buter networks that might be developed." It was also noted did not have sufficient manpower with the requisite skills	25 X 1		
to support upon to nominate pinterest and exper	project alone, and that all agencies would be called people to staff appropriate parts of the project within their stise. Walt Raymond provided a strong endorsement of the	25X1		
effort and supported the need for cooperative staffing efforts. 25X1 expressed concern that, given the sheer size and breadth of the DoD intelligence subset, it was an absolute necessity that links within DoD be in				
or act 30 that the	rink between bob and cir might be expedited.	25 X 1

INTELLIGENCE COMMUNITY STRATEGIC PLANNING ISSUE

COMPUTER SECURITY

Conc	erns:				
0	Explosive increase in computer utilization and data sharing through Intelligence Community and in agencies using intelligence information.				
0	Theory and practice of computer security has not advanced as quickly; therefore, vulnerability of computer systems to penetration has increased.				
0	Means of measuring the security of computer systems is not well developed.				
0	Intelligence Community's computer security program not fully established and will require long-term program.				
0	25X′				
0	US computer manufacturers are not uniformly serious about computer security.				
Back	ground:				
0					
	Computer security long recognized as important subject but excitement to use computers and share data have far outpaced determination and wherewithal to protect them.				
0	use computers and share data have far outpaced determination and				
o	use computers and share data have far outpaced determination and wherewithal to protect them.				
	use computers and share data have far outpaced determination and wherewithal to protect them. 25X "Pockets of Competence" in computer security exist in private industry.				
0	"Pockets of Competence" in computer security exist in private industry, academia and government. Need for computer systems with multilevel security features very intense, but no system has yet been accredited for use in a multilevel security
